Tyre Pre Cleaner - TPC 2500

Arp-Safe has developed a system for removal of foreign elements in old discarded tyres before they are transported to processing in shredders and granulators.
The T.P.C. handles ordinary car tyres as well as the larger truck tyres

The T.P.C. will rationalize sorting and improve working conditions considerably, Which ensures a minimum of of work related staff absence due to less manual handling.

This and the elimination of foreign elements in the tyres, which can cause major damage to your machinery, provides you with an economical advantage that makes the Tyre Pre Cleaner an important asset for your company.

The Tyre Pre Cleaner is with its simple and unique design easily integrated into any new or existing tire processing plant.
